Homewood Delphiniums

We are offering this year, divisions from our field-grown clumps of Superb Delphiniums. These plants are the result of careful hybridization by the best Delphinium specialists in the world and comprise the finest types from foremost hybridizers. We are continually striving to improve our collection, which we consider one of the finest in Canada, by adding improved strains and by roguing any types that do not measure up to Standard.

As a cut flower the Delphinium is unrivalled, for it is a splendid keeper and makes a glorious display. Because of its diversity of forms and colours, it is particularly attractive. Florets range in colour from deepest Indigo Blue to lightest Lavender, Pink and many beautiful pastel shades, with bees of black, brown or yellow and oftentimes, white. Plants grow from four to seven feet tall, one plant perhaps with florets placed airily and gracefully on the spikes and others of Wrenham or Hollyhock type with massive stalks of closely set florets.

During the past season our Delphs have swept the classes at all shows where exhibited. We now have several thousands of selected field grown clumps and during the 1928 blooming season you are cordially invited to visit our gardens. Seeing is believing.

We are offering for delivery during the Spring dividing season and up to June, strong healthy divisions from field grown clumps as follows:

From our finest selected unnamed
Hybrids each \$2, per
dozen \$20 00

From a fine line of unnamed
Hybrids covering a range
of many beautiful shades
each \$1.00, per dozen... \$10 00

Above prices are prepaid to your address and dozen prices will obtain on not less than half dozen quantities.

Terms cash with order.

For the Fall of 1928 we will accept orders for named varieties as listed below. Our Spring surplus of these varieties is entirely disposed of—

Our Prices will be right.
